

Utilizing Technology to support the changing teaching strategies

IAMSE Symposium: Current Challenges for the Medical Educator in Undergraduate Medical Education

Peter GM de Jong

Center for Innovation in Medical Education

Leiden University Medical Center, NL

AMFEM 2018, MAZATLÁN

Changes in teaching medicine over the years

- Rapid growth of body (bio)medical knowledge
- Medicine has become much more sub-specialized
- Number of students increased
- New insights in teaching
 - Active learning, small group, team based
 - Competency-based approach of assessing students

Transitioning from being teachers to being educators:
from content experts to coach

Lecturing and assessing is not enough anymore!

The Roles of the Medical Teacher

1. *Information provider*
2. *Assessor*
3. *Facilitator*
4. *Role model*
5. *Curriculum developer*
6. *Manager*
7. *Scholar*
8. *Professional*

The Eight Roles of the Medical Teacher; The purpose and function of a teacher in the healthcare professions. Ronald Harden and Pat Lilley, 2018

Merrill's first principles of Instruction (2002)

(learning activities)

When is instruction effective?

1. Learning is promoted when learners are engaged in solving real-world **problems**.
2. Learning is promoted when existing knowledge is **activated** as a foundation for new knowledge.
3. Learning is promoted when new knowledge is **demonstrated** to the learner.
4. Learning is promoted when new knowledge is **applied** by the learner.
5. Learning is promoted when new knowledge is **integrated** into the learner's world.

Margaryan's Principles on learning resources (2005, 2008)

(learning resources)

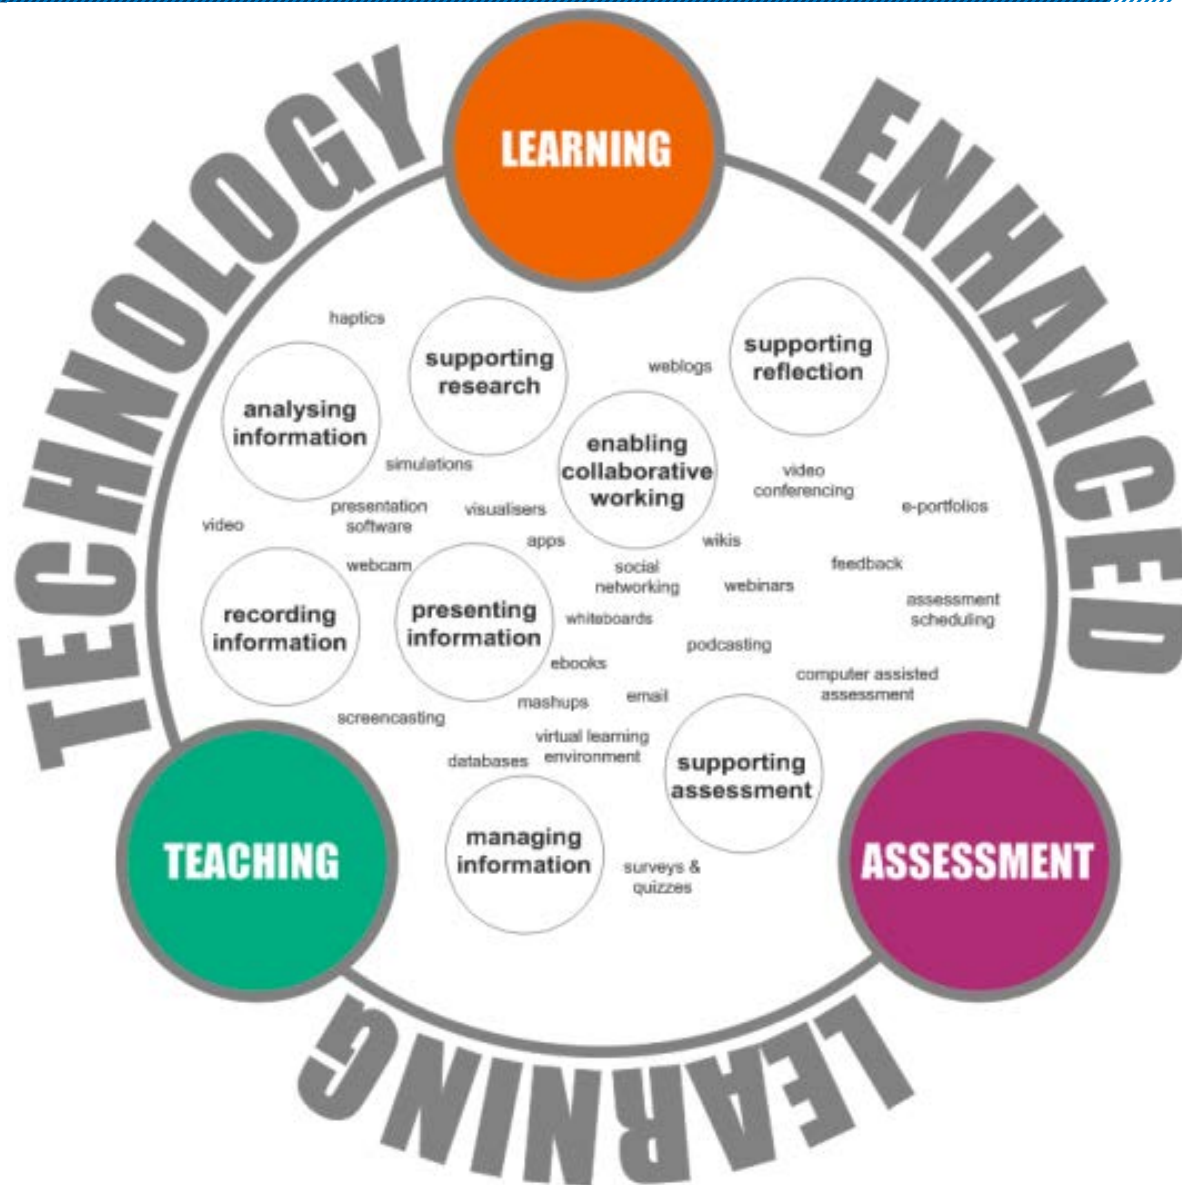

Learning is promoted:

1. When learners contribute to **collective knowledge**.
2. When learners **collaborate** with others.
3. When learners are provided **different** ways matching personal learning needs.
4. When learning resources are **authentic**/from real world settings.
5. When learners receive expert **feedback** on their performance.

How can technology support these strategies?

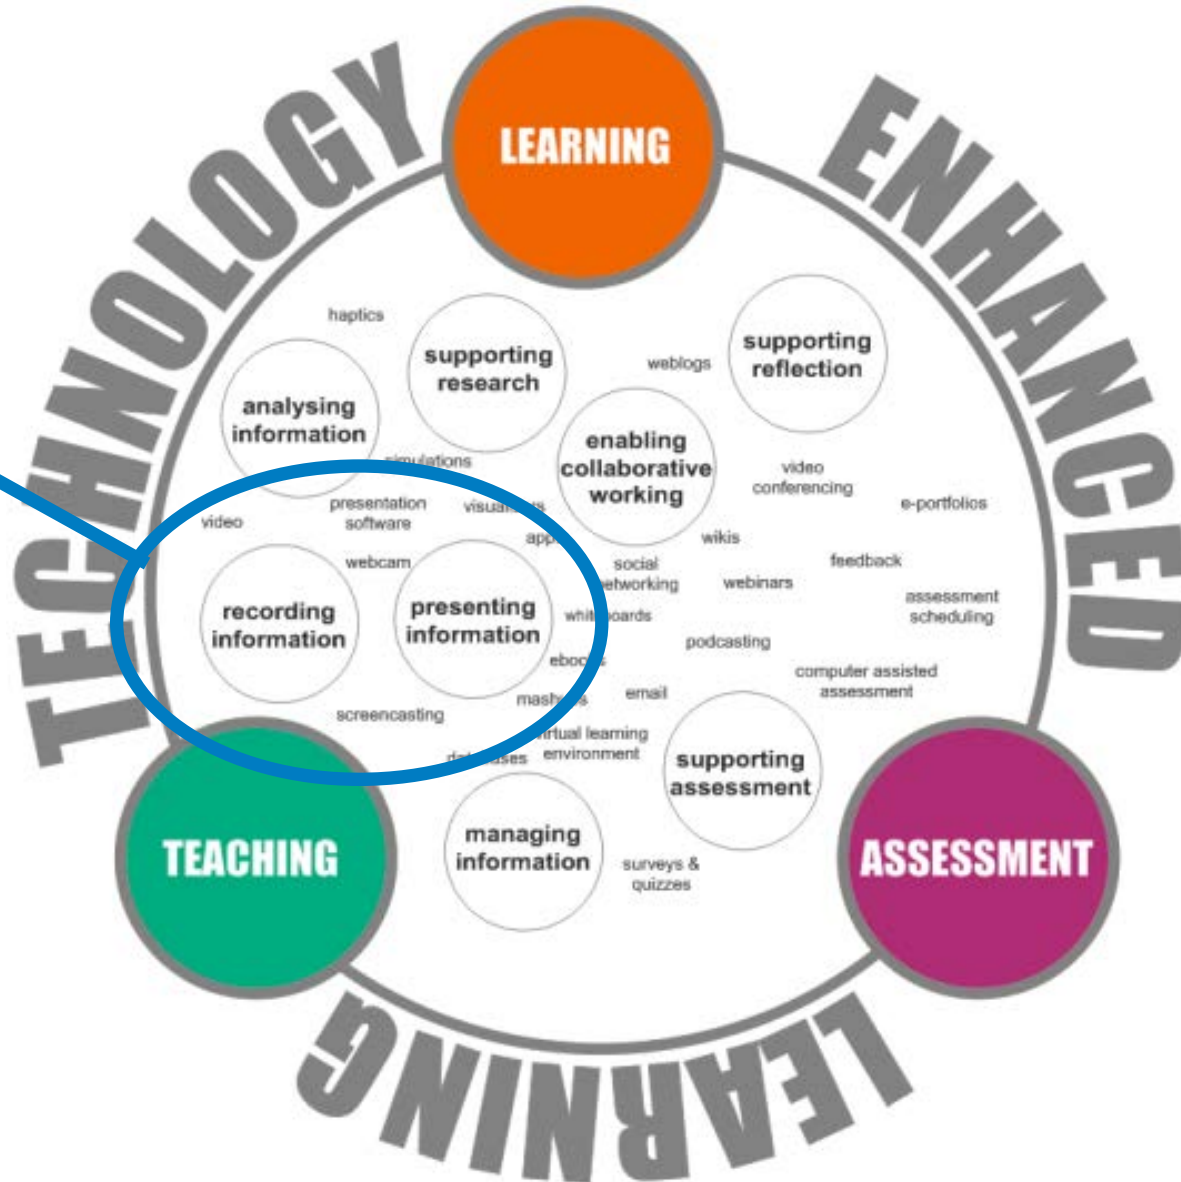

Technology Enhanced Learning

Some examples

Recorded lectures & Flipping the Classroom

- Useful for looking back in case of absence
- Useful for exam preparations
- Useful for preparation another class (flipped classroom)

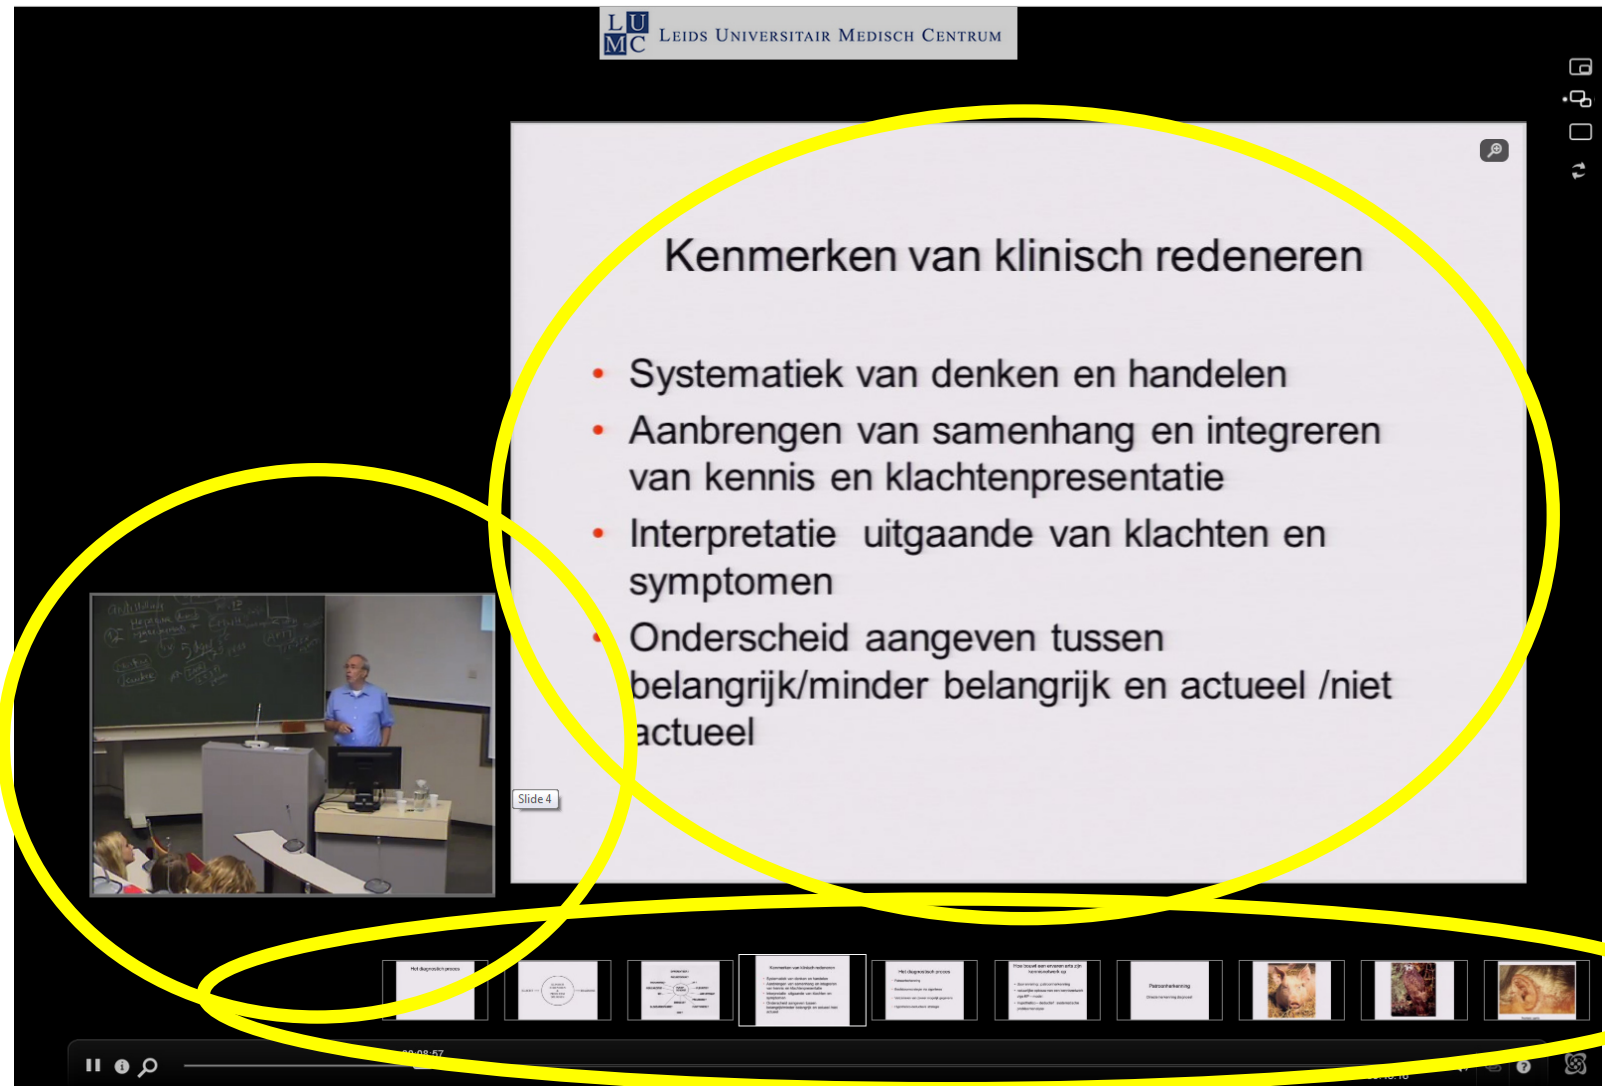

Recorded lectures & Flipping the Classroom

LU MC LEIDS UNIVERSITAIR MEDISCH CENTRUM

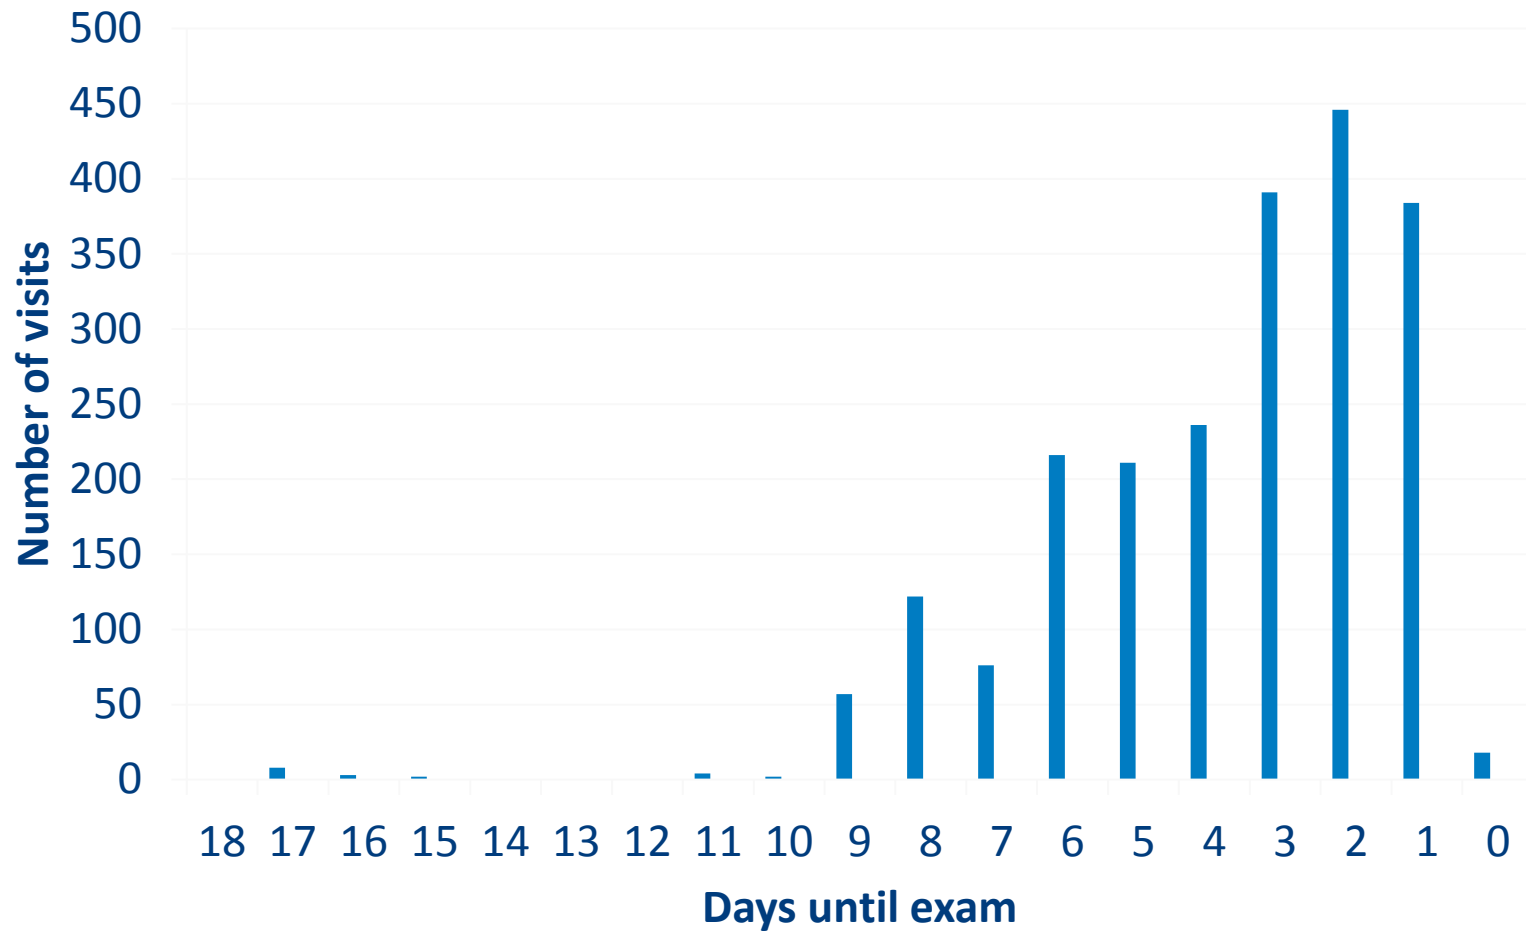

Kenmerken van klinisch redeneren

- Systematiek van denken en handelen
- Aanbrengen van samenhang en integreren van kennis en klachtenpresentatie
- Interpretatie uitgaande van klachten en symptomen
- Onderscheid aangeven tussen belangrijk/minder belangrijk en actueel /niet actueel

Summary

Technology can help the teacher and the student

- To make teaching and learning time and place independent
- To make teaching and learning more active
- To make students collaborate
